

# GPT Clone – Flask Bot

## Key Features

- **Integration of OpenAI GPT-3.5-Turbo:** Leveraged the advanced capabilities of the GPT-3.5-Turbo model to deliver intelligent and context-aware responses.
- **Flask Web Application:** Designed and developed a robust web application using Flask, combining backend efficiency with modern frontend technologies.
- **Interactive User Interface:** Built an intuitive and interactive UI using **HTML**, **CSS**, and **JavaScript**, ensuring a seamless user experience.
- **Dynamic Input and Output Flow:** Enabled real-time user interaction by capturing input, processing it through the GPT model, and dynamically displaying responses directly beneath the user message on the interface.
